## OSTEOPATHIC PHYSICIANS (DOs)

### THE OSTEOPATHIC MEDICAL PROFESSION

Developed more than 130 years ago by Andrew Taylor Still, MD, DO, osteopathic medicine brings a unique philosophy to traditional medicine. With an emphasis on the inter-relationship of the body's nerves, muscles, bones, and organs, osteopathic medical school curriculum prepares osteopathic medical students to apply the philosophy of treating the whole person to prevent, diagnose and treat illness, disease and injury.

Osteopathic physicians (DOs) are fully licensed to prescribe medicine and practice in all specialty areas, including surgery. DOs are trained to consider the health of the whole person and use their hands to help diagnose and treat their patients.

**As of May 31, 2013**  
Number of DOs: 82,146\*

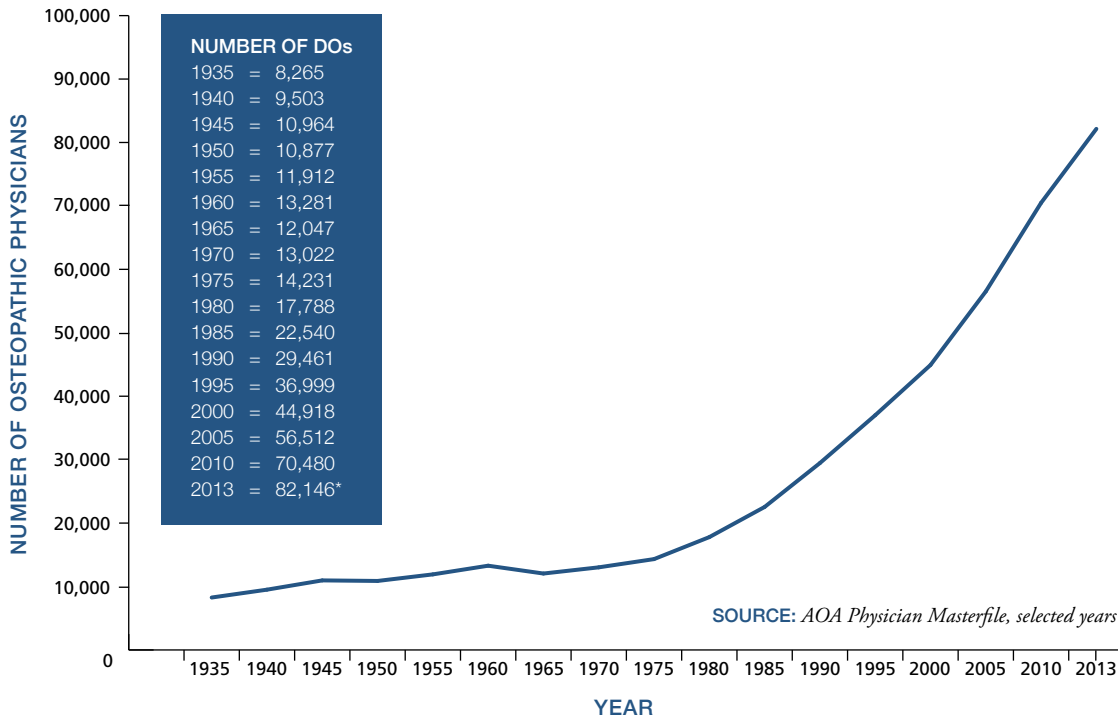

Estimated number of DOs in active practice: 73,074

*\* This number does not include the 2013 osteopathic medical school graduates. Including an estimated 5,154 graduates, there are an estimated 87,300 DOs in the United States.*

### Growth in Osteopathic Physicians

DOs are one of the fastest-growing segments of health care professionals in the United States. At the current rate of growth, it is estimated that more than 100,000 osteopathic physicians will be in active medical practice by the year 2020. The graph below shows the growth in the number of DOs since 1935.

**Number of Osteopathic Physicians 1935-2013**

*\* This number does not include the 2013 osteopathic medical school graduates. Including an estimated 5,154 graduates, there are an estimated 87,300 DOs in the United States.*

## AS OF MAY 31, 2013

Number of accredited OPTIs: 20  
 Approved Internship Training Programs: 126  
 Approved Internship Training Positions: 1,256  
 Approved Residency Training Programs: 942  
 Approved Residency Training Positions: 10,759

## Osteopathic Postdoctoral Training Institution & Program Enrollment

The American Osteopathic Association (AOA) established the Osteopathic Postdoctoral Training Institution (OPTI) in 1995.

Each OPTI is a community-based training consortium composed of at least one college of osteopathic medicine and one hospital. Other hospitals and ambulatory care facilities may also partner within an OPTI. Community-based health care facilities such as ambulatory care clinics, rehabilitation centers and surgicenters now have the resources and support necessary to provide physician training with an OPTI's assistance.

The following graph and table illustrate the growth in osteopathic physician enrollment in postdoctoral training programs for each academic year since 2005-06. They also illustrate the growth in number of DOs in primary care residencies. Today, over 50% of DOs in AOA residency programs are in primary care residencies, which include general practice, family practice, pediatrics, internal medicine, and obstetrics/gynecology.

### DO Enrollment in Osteopathic Postdoctoral Training Programs

	2010-11	2011-12	2012-13
Total DOs in AOA Internship & Residency Programs	6,322	6,895	7,498
DOs in AOA Residency Programs	5,731	6,290	6,883
DOs in AOA Internships	591	605	615
DOs in AOA Primary Care Residencies	2,744	3,117	3,491

**SOURCE:** AOA Intern/Resident contracts received by AOA Department of Education and AOA's Trainee Information, Verification, and Registration Audit System for academic year shown.

\* In July 2008, the AOA restructured the first postdoctoral year of training. As a result, most first-year positions are now offered as residency positions, though internships are still required in certain specialties. Prior to 2008, all AOA first-year postdoctoral training was classified as an internship.

\*\* Prior to 2008-09, trainees spent the first year of training in an AOA internship program.

## DIVERSITY AMONG OSTEOPATHIC PHYSICIANS

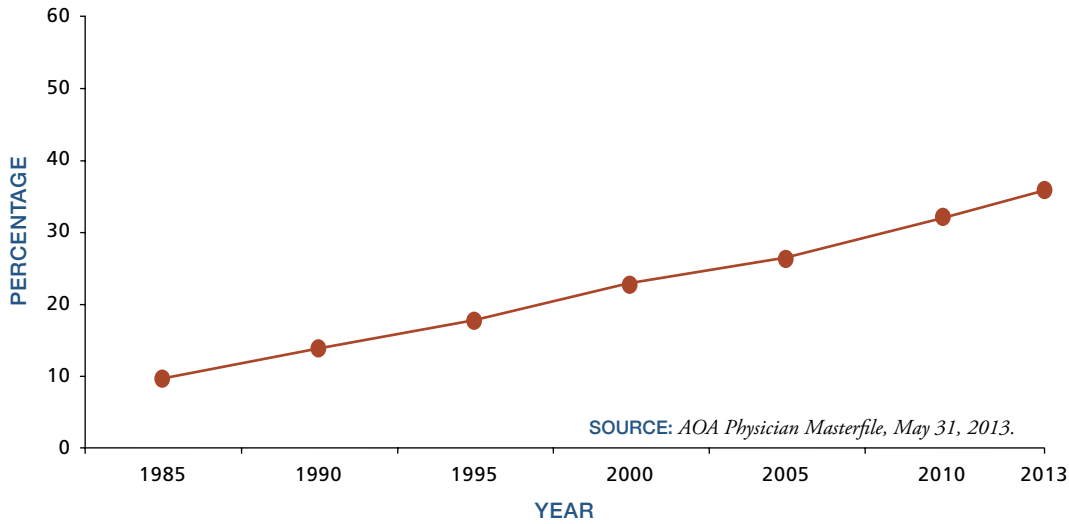

### GROWTH IN FEMALE OSTEOPATHIC PHYSICIANS

Since the first class convened at the American School of Osteopathy in 1892-93, women have been a part of the osteopathic medical profession. Today, women account for over one-third of all DOs, and this number is expected to continue to rise as more and more women enroll in osteopathic medical schools around the U.S.

### Percent of Female Osteopathic Physicians

	1985	1990	1995	2000	2005	2010	2012	2013
Percent	9.7	13.9	17.9	22.8	26.7	32.0	33.8	34.6

### Percent of Female Osteopathic Physicians 1985-2013

The table below further illustrates the increase in female osteopathic physicians. Today, almost half of all DOs in active practice four years or less after graduation are female.

### DOs in Active Practice by Number of Years after Osteopathic Medical School Graduation

# Years after Graduation	Female	Male	Total	% Female
0-4	7,686	8,280	15,966	48.1
5-9	6,952	7,706	14,658	47.4
10-14	4,777	7,341	12,118	39.4
15-19	3,304	6,091	9,395	35.2
20-24	2,268	5,189	7,457	30.4
25-29	1,641	5,237	6,878	23.9
30+	932	5,670	6,602	14.1
Total	27,560	45,514	73,074	37.7

SOURCE: AOA Physician Masterfile, May 31, 2013.

NOTE: Active practice includes all osteopathic physicians under the age of 65 who are not known to be inactive or retired.

## OSTEOPATHIC PHYSICIANS WITHIN THE U.S.

### STATES WITH THE LARGEST DO POPULATION

DOs have historically been concentrated in a few states like Michigan, Pennsylvania and Ohio. However, in recent years this pattern has changed, and DO populations are increasing distribution throughout all 50 states.

### Distribution of DOs in States With Top DO Populations

State	1984		State	2013	
	DOs	% of total DO population		DOs	% of total DO population
MI	3,246	15.1	PA	7,836	9.5
PA	2,753	12.9	MI	6,880	8.4
OH	1,894	8.8	FL	5,961	7.3
TX	1,476	6.8	CA	5,881	7.2
MO	1,375	6.4	NY	5,401	6.6
FL	1,373	6.4	OH	5,170	6.3
Total	10,744	56.4	Total	37,129	45.2

SOURCE: AOA Physician Masterfile, May 31, 2013.

## DO Population Within all 50 States and Washington, D.C.

The table below is a detailed look at the number of DOs in each state, the number of actively practicing DOs in each state, and the number of AOA members in each state.

### State of Residence of All DOs, DOs in Active Practice, and AOA DO Members

## OSTEOPATHIC PHYSICIAN SPECIALTIES

### DO DISTRIBUTION AMONG SELF IDENTIFIED PRACTICE SPECIALTIES

Due to an aging U.S. population and a preference by graduates to enter specialty practice, the country is facing an impending primary care physician shortage. In 2013, more than 60% of DOs in active practice with self-identified specialties are primary care physicians. These DOs practice in any of the following specialties: general practice, family practice, pediatrics, internal medicine, and obstetrics/gynecology.

### Self-Identified DO Practice Specialties 1984-2013

Year	Family and general practice		General internal medicine		Pediatrics and adolescent medicine		Obstetrics		Osteopathic manipulative medicine (OMM) or osteopathic manipulative treatment (OMT) specialties		Other specialty	
	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%
2013	22,176	36.9	7,817	13.0	3,490	5.8	2,771	4.6	1,134	1.9	22,633	37.7
2012	22,363	37.9	7,618	12.9	3,373	5.7	2,727	4.6	946	1.6	22,003	37.3
2011	22,834	39.0	7,481	12.8	3,284	5.6	2,698	4.6	811	1.4	21,402	36.6
2010	19,737	39.1	5,687	11.3	2,612	5.2	2,170	4.3	902	1.8	19,010	37.7
2009	18,964	40.9	4,620	10.0	2,178	4.7	2,001	4.3	813	1.8	17,613	38.0
2008	18,680	42.6	4,171	9.5	1,995	4.5	1,858	4.2	656	1.5	16,178	36.9
2007	18,976	44.7	4,037	9.5	1,791	4.2	1,637	3.9	602	1.4	14,665	34.5
2006	18,610	46.1	3,468	8.6	1,325	3.3	1,543	3.8	498	1.2	14,020	34.7
2005	17,800	46.3	3,107	8.1	1,176	3.1	1,465	3.8	464	1.2	13,431	34.9
2004	16,752	45.5	2,994	8.1	1,127	3.1	1,416	3.8	448	1.2	13,050	35.5
1994	10,136	44.8	1,487	6.6	560	2.5	754	3.3	753	3.3	8,048	35.5
1984	7,224	56.4	598	4.7	236	1.8	361	2.8	62	0.5	3,033	23.7

**NOTES/SOURCES:** The table includes only DOs in active practice who have self identified their practice specialty. "Pediatrics and adolescent medicine" includes all specialties where the patient is a child or an adolescent and includes both general pediatricians and pediatric specialties. The categories "family and general practice" and "general internal medicine" do not include family physicians, general practitioners and general internists who also practice secondary specialties. Those osteopathic physicians are counted under "other specialty." The category "OMT/OMM" includes family physicians who stress OMT in their practices in addition to osteopathic physicians who specialize in OMM. There are 13,053 DOs in active practice who have an unknown specialty and are not included in the above table.

### Number of AOA Certifying Boards: 18 (As of May 31, 2013)

### Number of DOs Actively Board Certified by the AOA

2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
22,205	22,395	23,001	23,885	24,870	26,017

## Number of Specialty, Subspecialty and Areas of Added Qualifications Possible for AOA Certification

2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
67	72	75	75	77	77

## AGE OF PHYSICIAN POPULATION

### Age of DOs in Active Practice

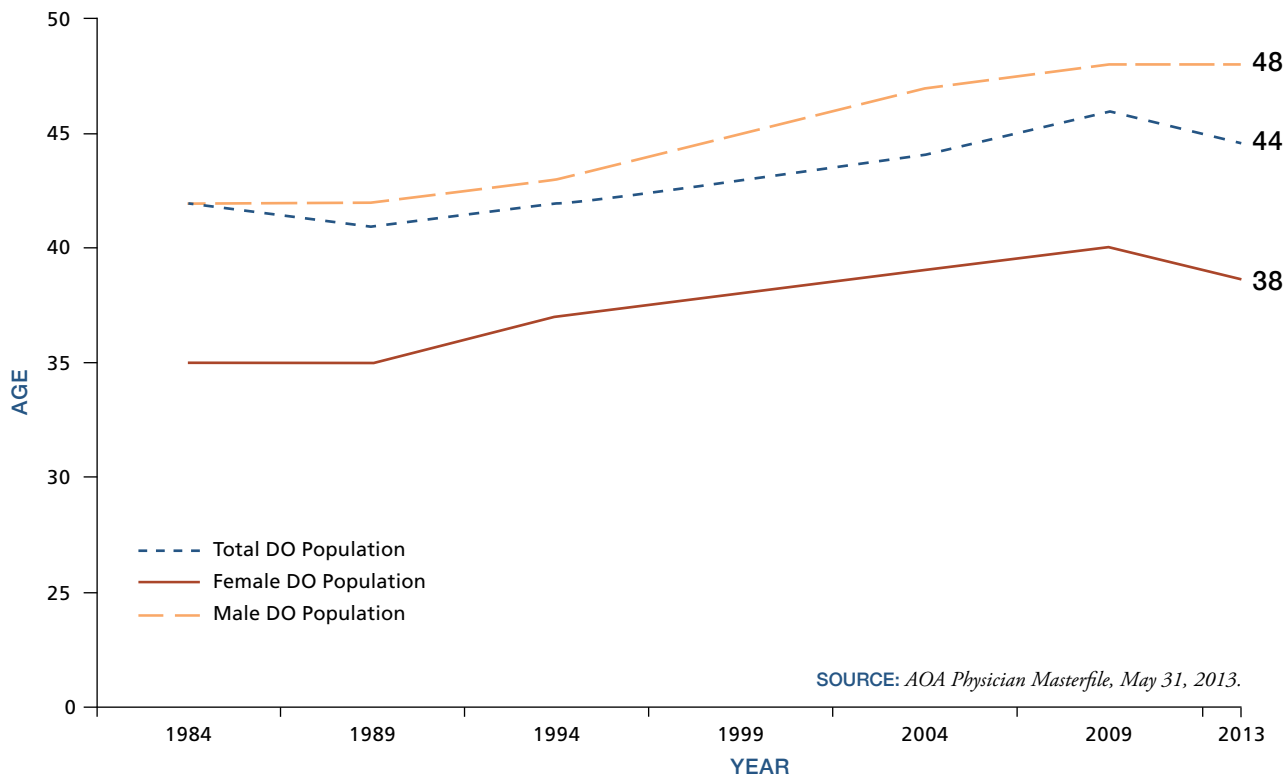

Age	Female	Male	Total	% of all Female
< 35	10,135	9,655	19,790	36.8

## OSTEOPATHIC MEDICAL STUDENTS

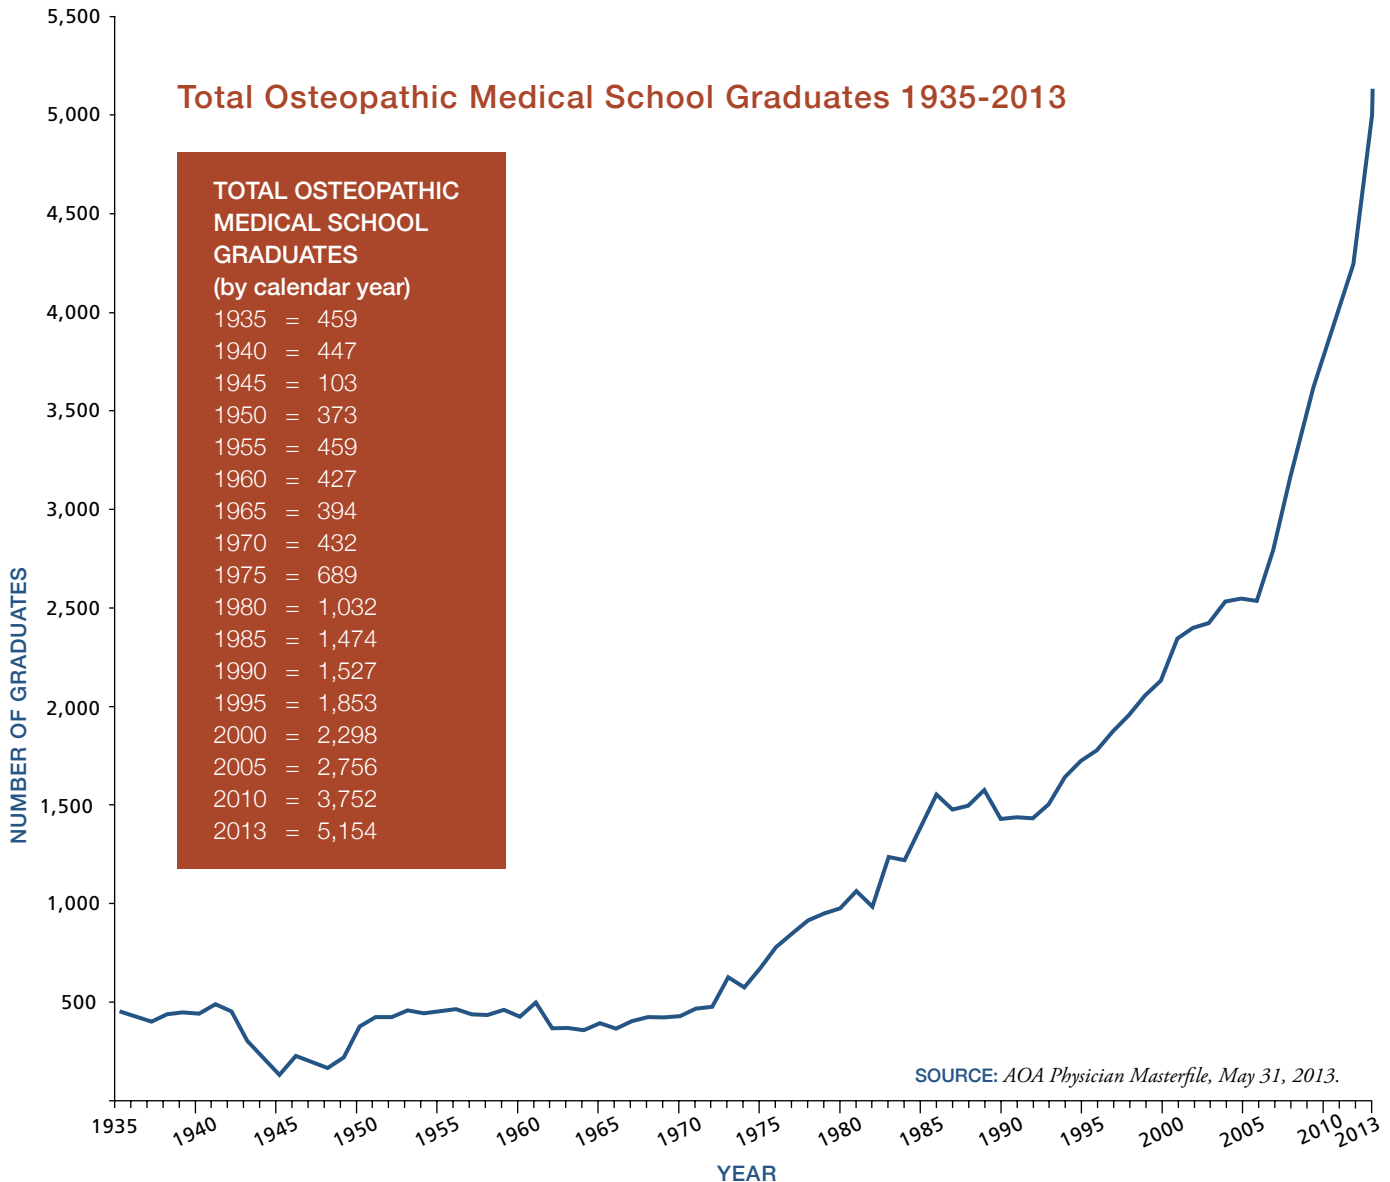

In addition to the DO population growth, the osteopathic medical student population is increasing. In the 2013-14 academic year, the AOA's Commission on Osteopathic College Accreditation (COCA) accredits 29 colleges of osteopathic medicine operating in 37 locations. The table below illustrates the growth in osteopathic medical school student enrollment each academic year since 2007-08.

### Percent Increase of Osteopathic Medical School Enrollment

	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
Total enrollment	15,634	16,893	18,033	19,427	20,663	21,741
Change from prior year	8.5% ↑	8.1% ↑	6.7% ↑	7.7% ↑	6.4% ↑	5.2% ↑

**SOURCE:** Total Enrollment by Gender 1968-2013 (March 25, 2013). [www.aacom.org/data](http://www.aacom.org/data). All osteopathic medical student statistics used with permission from the American Association of Colleges of Osteopathic Medicine (AACOM).

The graph below illustrates the growth in osteopathic medical school graduates each calendar year since 1935.

## Growth in Colleges of Osteopathic Medicine Enrollment

For a more detailed look at the increase in osteopathic medical school students, the table on this page reports the number of enrolled osteopathic medical school students for each osteopathic medical school or branch campus in the past three years, where applicable.

### Osteopathic Medical School Total Enrollment by Academic Year

## DIVERSITY AMONG OSTEOPATHIC MEDICAL STUDENTS

### GROWTH IN FEMALE OSTEOPATHIC MEDICAL STUDENTS

While few career paths were open to women in the late 1800s, the first class to convene at the American School of Osteopathy in 1892-93 included women. The number of female DOs increased until World War II, when female enrollment sharply decreased. However, by the 1960s women were again a prominent number in osteopathic medical schools. Today, women account for nearly half of the total enrollment in osteopathic medical schools.

### Percent of Female Osteopathic Medical Students

	1989-90	1994-95	1999-00	2004-05	2009-10	2012-13
Percent	31	35	40	49	48	46

### Percent of Female Osteopathic Medical Students 1985-2013

**SOURCE:** Total Enrollment by Gender 1968-2013 (March 25, 2013). [www.aacom.org/data](http://www.aacom.org/data). All osteopathic medical student statistics used with permission from AACOM.

While the percent of female enrollment in osteopathic medical schools has declined in recent years, the total number of female osteopathic medical students has steadily increased.

### Total Osteopathic Medical School Enrollment by Gender

Academic Year	# of Males	%	# of Females	%	Total Enrolled
2006-07	7,163	50	7,246	50	14,409
2007-08	7,904	51	7,730	49	15,634
2008-09	8,678	51	8,215	49	16,893
2009-10	9,442	52	8,591	48	18,033
2010-11	10,259	53	9,168	47	19,427
2011-12	11,117	54	9,546	46	20,663
2012-13	11,818	54	9,923	46	21,741

### Ethnicity of Osteopathic Medical Students

The diversity of osteopathic medical schools is not only represented in the female population. The American Association of Colleges of Osteopathic Medicine plays a critical role in encouraging all minorities to pursue a career in osteopathic medicine.
